

LeadPulse CRM – Smart Lead Management for Modern Car Dealerships

28 June 2026

OVERVIEW

HSR Motors currently manages customer leads using spreadsheet software. While spreadsheets allow lead tracking, they create significant operational challenges such as lack of real-time collaboration, missed follow-ups, limited visibility into lead progress, and difficulty in generating business insights.

The primary objective of this solution is to create a centralized Lead Management System that enables the Sales Team to efficiently manage and convert leads while providing Business Managers with actionable insights through real-time dashboards and analytics.

To solve this problem, I designed LeadPulse CRM, a modern desktop-based lead management platform that streamlines the complete lead lifecycle from lead acquisition to final conversion. The platform focuses on collaboration, automation, lead prioritization, and business intelligence.

The solution is designed around two primary user groups:

1. Sales Team
 - Manage assigned leads
 - Track customer interactions
 - Schedule follow-ups
 - Update lead status efficiently
2. Business Manager
 - Monitor sales performance
 - Analyze lead sources
 - Track conversion funnels

-
- Identify business opportunities and bottlenecks

The overall design philosophy emphasizes simplicity, productivity, automation, and data-driven decision-making.

The success of the product will be measured through Lead Conversion Rate, Response Time, Follow-up Compliance, and Source-wise ROI.

FEATURES

1. Lead Listing

Purpose:

Provide a centralized view of all incoming leads.

Key Features:

- Search and filter leads by source, status, score, and salesperson
- Bulk assignment and bulk updates
- Lead aging indicators
- Lead source tracking
- Follow-up tracking
- Lead scoring (Hot, Warm, Cold)

Business Benefit:

Enables sales teams to quickly prioritize and act on high-value opportunities.

2. Lead Details View

Purpose:

Provide complete customer context and interaction history.

Key Features:

- Customer profile
- Activity timeline
- Call history
- Follow-up records
- Lead intelligence panel
- Conversion probability analysis

Business Benefit:

Provides sales executives with all relevant information in a single view, reducing context switching and improving customer engagement.

3. Sales Pipeline Management

Purpose:

Enable visual tracking of lead progression through the sales funnel.

Key Features:

- Kanban-based workflow
- Drag-and-drop lead movement
- Pipeline stage tracking
- Lead score visibility
- Follow-up alerts
- Team collaboration support

Pipeline Stages:

New → Contacted → Qualified → Test Drive → Negotiation → Won / Lost

Business Benefit:

Improves transparency and collaboration while helping teams identify bottlenecks in the sales process.

4. Business Dashboard

Purpose:

Provide managers with real-time business insights.

Key Features:

- Total leads overview
- Conversion funnel
- Lead source analysis
- Team leaderboard
- Monthly lead trends
- Lead status distribution

Business Benefit:

Supports data-driven decision making and helps managers optimize lead acquisition and sales performance.

5. Smart Automation Features

AI Lead Scoring

Automatically classifies leads as:

- Hot
- Warm
- Cold

Based on:

- Engagement level
- Customer interest
- Follow-up activity
- Budget fit

Smart Follow-up Reminders

Automatically alerts sales representatives when a lead has not been contacted within a predefined time period.

Duplicate Lead Detection

Identifies duplicate phone numbers and customer records to avoid redundant communication.

Next Best Action Recommendations

Suggests actions such as:

- Schedule Test Drive
- Call Customer
- Send Brochure
- Schedule Follow-up

These automations improve productivity and increase lead conversion efficiency.

Source Performance Insights

- Identifies marketing channels generating the highest-quality leads.
- Helps managers optimize advertising spend across Facebook, Google, Website, and Offline Events.

Screen 4 – Business Dashboard

USER FLOW

- Lead is received from Facebook, Google, Website, Referral, or Offline Events.
- Lead is automatically created in LeadPulse CRM and assigned to a salesperson.
- Sales representative contacts the customer and updates lead information.
- Lead progresses through various stages:
New → Contacted → Qualified → Test Drive → Negotiation → Won / Lost
- Smart reminders ensure timely follow-ups.
- Business managers monitor performance through dashboards and analytics.
- Lead is ultimately marked as Won or Lost.

This workflow ensures visibility, accountability, and efficient lead conversion across the organization.
